SHIFT

Wylie Hose Reel

At home on the Porch or patio.

Installation is simple on a variety of surfaces.

Witnessing gardeners coil hoses around shelf brackets and wheels, around spigots and stuffing them in boxes - we decided to be the change.

Wylie is produced for casual greenthumbs and expert gardeners alike searching for a no-fuss option. In small spaces like city gardens and urban yards it shines, but Wylie is suitable for a variety of green spaces. Heck, it could even be decorative.

The hose hook is a high-visibility and oft neglected component of

the outdoor space, like the mail box. This simple product can alter the front or back of a house.

We've seen the appeal of Wylie go beyond the design community. Wylie has been installed at over 1,000 residences across America, and that number is growing daily.

Our engaging, unconventional hose reel blends with modern environments and functions, and is built to last a lifetime.

SHIFT

Suitable for 50-100 feet of garden hose or electric vehicle cable. ◀

Custom configurations available upon request. ▶

Wylie is a sculptural aluminum hook to coil your garden hose or EV cable on. Whether you're entertaining, watering your plants, or reading a book - this minimalist and wall mountable hose reel elevates the porch and patio.

Designed by SHIFTSPACE for Shift, an American design brand.
